Section I. Stopping Power, Energy Loss, and Multiple Scattering

Stopping power determinations by the transmission technique
J. Räisänen, U. Wätjen, A.J.M. Plompen and F. Munnik 1
Stopping-powers and straggling of ^{15}N ions for nuclear reaction analysis at 6.385 MeV
P. Goppelt-Langer, S. Yamamoto, Y. Aoki, H. Takeshita and H. Naramoto 7
Stopping power measurements of ^{1}H, ^{4}He and ^{14}N in Si in the energy range of 0.02–1 MeV/amu
D. Niemann, G. Konac and S. Kalbitzer 11
Measured stopping cross sections for hydrogen in a-Si_xC_{1-x}:H ternary compounds near their maximum values
L. Leblanc and G.G. Ross 19
Stopping cross sections of C, Al, and Si for ^{7}Li ions
J. Liu, Z. Zheng and W.-K. Chu 24
Study of implantation damage ranges in metals at temperatures ranging from 5 to 300 K
E. Friedland, N.G. van der Berg, O. Meyer and S. Kalbitzer 29
Rutherford backscattering and channeling study of Au trapped at cavities in silicon
J. Wong-Leung and J.S. Williams 34
Stopping cross section of protons and deuterons in lithiumniobate near the stopping power maximum
I. Paulini, W. Heiland, A. Arnau, E. Zarate and P. Bauer 39
Measurement of the stopping powers for channeled ions in ion implanted single crystals
E. Kótai 43
Non-Liouvillean achromatic beam guidance systems
H. Wollnik and M. Winkler 47

Section II. RBS, Channeling, and other IBA Techniques

CUTBA (Cleaning Up the Tower of Babel of Acronyms) in IBA
G. Amsel 52
Application of NRA/channeling to study He^{+} implanted waveguides
E.K. Williams, D. Ila, S. Sarkisov, P. Venkateswarlu and D.B. Poker 57
Backscattering spectroscopy developments for the University of Oxford Scanning External Proton Milliprobe (SEPM)
R.A. Jarjis 62
Emission channeling study of annealing of radiation damage in heavy-ion implanted diamond
H. Quintel, K. Bharuth-Ram, H. Hofsäss, M. Restle and C. Ronning 72
Alpha-emission channeling investigations of the lattice location of Li in Ge
U. Wahl, S.G. Jahn, M. Restle, C. Ronning, H. Quintel, K. Bharuth-Ram, H. Hofsäss and the ISOLDE Collaboration 76
In situ observation by RBS of oxygen gettering during Cs sputtering of Si-based materials
W. De Coster, B. Brijs, J. Deleu, J. Alay and W. Vandervorst 82
Characterization of carbon in heteroepitaxial $Si_{1-x-y}Ge_xC_y$ thin films via combined ion channeling and nuclear resonance analysis
S. Hearne, N. Herbots, J. Xiang, P. Ye and H. Jacobsson 88

0168-583X/96/$15.00 Copyright © 1996 Elsevier Science B.V. All rights reserved

Strained-layer analysis with high-energy ion channeling
P.W.L. van Dijk, L.J. van IJzendoorn and M.J.A. de Voigt 97

Measurements of ranges and variances of 1–20 keV N and O ions implanted in Be and $C_{0.83}H_{0.17}$ by means of RBS with a ^{4}He beam at 350 keV
J.F. Pageau and G.G. Ross 103

Characterization of BiSrCaCuO thin films by the complementary use of IBA and AES analytical techniques
A. Climent-Font, C. Palacio, M.T. Fernández-Jiménez and D. Díaz 108

Investigation of weakly damaged ⟨110⟩, ⟨111⟩ and ⟨100⟩ silicon by means of temperature dependent dechanneling measurements
B. Weber, E. Wendler, K. Gärtner, D.M. Stock and W. Wesch 113

Diffusing species and growth interfaces during cobalt disilicide formation
C.M. Comrie 119

Ion beam channeling study of cobalt implanted sapphire
E. Jároli, E. Szilágyi, N.Q. Khánh and B. Pécz 123

Different methods for the determination of damage profiles in Si from RBS-channeling spectra: a comparison
E. Albertazzi, M. Bianconi, G. Lulli, R. Nipoti and M. Cantiano 128

SIMS, RBS, and ion channelling studies of $^2H^+$ or $^{18}O^+$ irradiated $LaAlO_3$ (100) single crystal
Y. Li, J.A. Kilner, T.J. Tate, R.J. Chater, C. Jeynes and Z.H. Jafri 133

Composition analysis of Nd_xFe_yB thin films by RBS and heavy ion ERDA
R. Grötzschel, M. Mäder, U. Kreissig, S. Grigull, W. Assmann and S. Parhofer 139

Hydrogen passivation of Si(100) wafers as templates for low temperature ($T < 600$°C) epitaxy
V. Atluri, N. Herbots, D. Dagel, S. Bhagvat and S. Whaley 144

Segregation effects in SIMS profiling of impurities in silicon by low energy oxygen ions
M. Petravić, B.G. Svensson, J.S. Williams and J.M. Glasko 151

Surface analysis of carbon based plasma facing material using MeV region ion beam
S. Amemiya, T. Masuda, T. Ando, K. Kodama and K. Masaki 156

Rutherford backscattering spectrometry for the analysis of atmospheric aerosols
P. Kováč, J. Dobrovodský, S. Kalbitzer and Ch. Klatt 162

Section III. Nuclear Resonance and Reaction Analysis

Application of $^{14}N(^3He, ^4He)^{13}N$ nuclear reaction to nitrogen depth profiling in metals
L.S. Wielunski 167

Prompt charged particle activation analysis for light elements determination
G. Giorginis 172

Use of large Ge detectors in place of BGO detectors for hydrogen profiling or other particle-gamma NRA
W.A. Lanford, K. Cummings and J. Kadlecek 176

Nuclear reaction analysis of hydrogen in Li-containing material
O. Dersch, M. Laube and F. Rauch 180

Efficient γ-ray detection in ion beam analysis
N. Piel, W.H. Schulte, M. Berheide, H.W. Becker, L. Borucki, C. Grama, M. Mehrhoff and C. Rolfs . 186

Use of the 7.6 MeV $^{16}O(\alpha,\alpha)$ resonance in studying the anomalous channeling behaviour of $YBa_2Cu_3O_{7-x}$ near T_c
J.U. Andersen, G.C. Ball, J.A. Davies, J.S. Forster, J.S. Geiger, R. Haakenaasen, N.E. Hecker, L.E. Rehn, R.P. Sharma and A. Uguzzoni 190

An electrostatic filter for high resolution nuclear reaction analysis
M. Healy 196

Guidelines to the application of nuclear resonance to quantitative thin film analysis
S.W. Russell, T.E. Levine, A.E. Bair and T.L. Alford 201

Optimized system for hydrogen detection
R.L. Zimmerman, D. Ila and J.K. Hirvonen 206
Conventional depth profiling using narrow nuclear resonances
Y. Miyagawa, K. Saitoh, M. Ikeyama, S. Nakao and S. Miyagawa 209
Cross sections for light element analysis by non-Rutherford scattering
Z.S. Zheng, J.R. Liu, X.T. Cui and W.K. Chu 214
Cross section measurements for the (^{3}He, p) nuclear reaction on B and N between 2 and 4 MeV
L.C. McIntyre Jr., J.A. Leavitt, M.D. Ashbaugh, J. Borgardt, E. Andrade, J. Rickards and A. Oliver. . 219
Cross section of the B(α,p)C nuclear reaction for analytical applications
G. Giorginis, P. Misaelides, A. Crametz and M. Conti 224
Backscattering analysis of thin SiO_2 films on Si using $^{16}O(\alpha,\alpha)^{16}O$ 3.045 MeV resonance
M. Watamori, K. Oura, T. Hirao and K. Sasabe 228
Channeling analysis of oxygen in oxide materials using $^{16}O(\alpha, \alpha)^{16}O$ resonant backscattering
M. Watamori, K. Oura, T. Hirao and K. Sasabe 233
Deuterium radial redistribution in Zr-liner cladding tubes
I. Takagi, T. Hattori, M. Hashizumi and K. Higashi 238

Section IV. Elastic Recoil Detection Analysis

ERDA with very heavy ion beams
W. Assmann, J.A. Davies, G. Dollinger, J.S. Forster, H. Huber, Th. Reichelt and R. Siegele 242
Light and heavy element profiling using heavy ion beams
P. Goppelt-Langer, S. Yamamoto, Y. Aoki, H. Takeshita and H. Naramoto. 251
Multiple and double scattering contributions to depth resolution and low energy background in hydrogen elastic recoil detection
L.S. Wielunski 256
Hydrogen desorption induced by heavy-ions during surface layer analysis with ERDA
R. Behrisch, V.M. Prozesky, H. Huber and W. Assmann 262
Recoil selection by pulse shape discrimination in elastic recoil detection analysis with α-particles (α-ERDA)
A.J.H. Maas, S.S. Klein, D.P.L. Simons and M.J.A. de Voigt 268
Comparison of elastic resonance and elastic recoil detection in the quantification of carbon in SiGeC
A.E. Bair, Z. Atzmon, S.W. Russell, J.C. Barbour, T.L. Alford and J.W. Mayer 274
Heavy ion time-of-flight ERDA of high dose metal implanted germanium
N. Dytlewski, P.J. Evans, J.T. Noorman, L.S. Wielunski and J. Bunder 278
Simultaneous multielement ERDA using a simple detector system and extremely heavy ion beams
R. Siegele, W. Assmann, J.A. Davies and J.S. Forster. 283
Limits in elastic recoil detection analysis with heavy ions
G. Dollinger, M. Boulouednine, A. Bergmaier, T. Faestermann and C.M. Frey. 291
Ion beam analysis of electropolymerized porphyrin layers
C.H.M. Marée, A. Kleinpenning, A.M. Vredenberg and F.H.P.M. Habraken 301
Quantitative depth profiling of light elements by means of the ERD $E \times B$ technique
F. Schiettekatte, A. Chevarier, N. Chevarier, A. Plantier and G.G. Ross 307
Measurement of hydrogen content in diamond like carbon thin films by ERDA
Y. Konishi, I. Konishi, N. Sakauchi, S. Hayashi, A. Hirakimoto and J. Suzuki 312
Hydrogen and deuterium profile in homoepitaxially grown CVD diamonds by ERDA method
H. Yagi, K. Tanida, A. Hatta, T. Ito and A. Hiraki. 318
Empirical modeling of ion beam-induced hydrogen depletion
S. Turgeon and R.W. Paynter 322
Evaluation of spectra of energetic ions not fully stopped in ΔE–E_{rest} telescopes
V.M. Prozesky, H. Huber, W. Assmann and R. Behrisch 327
3D-microERDA microscopy of implanted H-distributions in diamond
S.H. Connell, E. Sideras-Haddad, C.G. Smallman, J.P.F. Sellschop, I.Z. Machi and K. Bharuth-Ram . 332

Section V. Particle-induced X-ray Emission

Depth resolved ion beam analysis of objects of art
C. Neelmeijer, W. Wagner and H.P. Schramm 338
Low energy PIXE: advantages, drawbacks, and applications
J. Miranda 346
Differential PIXE analysis of Mesoamerican jewelry items
G. Demortier and J.L. Ruvalcaba-Sil 352
Lead levels in Mexican human teeth from different historical periods using PIXE
C. Solis, A. Oliver, L. Rodriguez-Fernandez, E. Andrade, M.E. Chavez-Lomeli, J. Mancilla and O. Saldivar 359
Analysis of radiation-induced segregation in type 304 stainless steel by PIXE and RBS channeling
K. Kawatsura, T. Nakae, R. Takahashi, Y. Nakai, S. Arai, Y. Aoki, P. Goppelt-Langer, S. Yamamoto, H. Takeshita, H. Naramoto, Y. Horino, Y. Mokuno, K. Fujii, T. Mitamura, M. Terasawa, H. Uchida and K. Koterazawa 363
Determination of lattice displacements in 2 MeV Se^+ implanted GaAs by RBS and PIXE channeling experiments
E. Wendler, F. Schrempel, P. Müller, K. Gärtner and W. Wesch 367
A compact wavelength-dispersive X-ray spectrometer for particle-induced X-ray emission analysis
Y. Furukawa, K. Yokoyama, K. Inoue, K. Ishibashi and H. Fukuyama 372
PIXE analysis of ancient Chinese Qing dynasty porcelain
Cheng Huansheng, He Wenquan, Tang Jiayong, Yang Fujia and Wang Jianhua 377
Channeling studies of YBaCuO thin films with combined RBS and PIXE
K.H. Ecker, Z. Quan, T. Schurig and H.P. Weise 382
PIXE study of atmospheric aerosols in mountain region of Poland
J. Jagielski, H. Viguier, J.P. Frontier, P. Trouslard, B. Kopcewicz, M. Kopcewicz and L. Thomé 388
The analysis of trace elements in human teeth collected from the Oxfordshire area in the UK
D.W. Lane and C.A. Duffy 392
PIXE studies on artifacts from Saugus Iron Works
C. Narayan, M. O'Connor, G.H.R. Kegel, R. Johnson, C. Salmons and C. White 396
Soluble and insoluble components of air pollutants scavenged by rain water
M. Kasahara, H. Ogiwara and K. Yamamoto 400
Mapping of aerosols' elemental distribution in two zones in Romania by PIXE analysis
S. Amemiya, T. Masuda, L. Popa-Simil and L. Mateescu 403
Backscattering studies of ^7Li, ^{12}C and ^{16}O ions at energies 3–15 MeV
H.S. Cheng, Y.C. Yu, C.W. Wang, E.K. Lin, T.Y. Liu, M.S. Chen and M.S. Chang 408
Chemical diagenesis in fossil shells from Baja California, México studied using PIXE and mass spectrometry
A. Oliver, C. Solís, L. Rodríguez-Fernandez and E. Andrade 414

Section VI. Microbeams

Application of medium energy nuclear microprobe to semiconductor process steps
M. Takai, T. Kishimoto, R. Mimura, H. Sawaragi and R. Aihara 418
High energy single ion hit system combined with heavy ion microbeam apparatus
T. Kamiya, T. Suda and R. Tanaka 423
Defect imaging and channeling studies using channeling scanning transmission ion microscopy
P.J.C. King, M.B.H. Breese, P.J.M. Smulders, P.R. Wilshaw and G.W. Grime 426
Laterally resolved crystalline damage in single-point-diamond-turned silicon
C. Jeynes, K.E. Puttick, L.C. Whitmore, K. Gärtner, A.E. Gee, D.K. Millen, R.P. Webb, R.M.A. Peel and B.J. Sealy 431

The Debrecen scanning proton microprobe facility and its applications to geological samples
I. Rajta, I. Borbély-Kiss, Gy. Mórik, L. Bartha, E. Koltay, Á.Z. Kiss and Gy. Szöőr 437
Design of a new high voltage generator for ion beam analysis
K. Ishibashi, Y. Furukawa, C. Ichihara, K. Yokoyama, K. Inoue and H. Fukuyama 442
Sub-micron microbeam apparatus for high resolution materials analyses
T. Kamiya, T. Suda and R. Tanaka 447
Off-axis STIM nuclear microprobe analysis
K.A. Sjöland and P. Kristiansson 451

Section VII. Surfaces and Interfaces

Ion scattering and scanning tunneling microscopy studies of stepped Cu surfaces
E. Taglauer, St. Reiter, A. Liegl and St. Schömann 456
Coaxial impact collision ion scattering spectroscopy studies of Sb adsorption on the two-domain (100) surface of silicon
T.C.Q. Noakes and C.F. McConville 462
Order–disorder phase transition of the $Cu_3Au(100)$ surface studied by ToF-ion scattering
L. Houssiau and P. Bertrand 467
Energetic ion impacts on quartz surfaces: a study by atomic force microscopy
I.H. Wilson, J.B. Xu, R.A.B. Devine and R.P. Webb 473
Channeling study of melting and solidification of lead nanocrystals in aluminium
K.K. Bourdelle, A. Johansen and E. Johnson 478
Vibrations of surface atoms studied by NRRA
M. Berheide, H.W. Becker, L. Borucki, M. Buschmann, N. Piel, C. Rolfs, W.H. Schulte, G.E. Mitchell and J.S. Schweitzer 483
Surface and sub-surface defects on graphite after single ion impact studied with STM
W. Bolse, K. Reimann, U. Geyer and K.P. Lieb 488
Thickness of the SiO_2/Si interface and composition of silicon oxide thin films: effect of wafer cleaning procedures
F.C. Stedile, I.J.R. Baumvol, I.F. Oppenheim, I. Trimaille, J.-J. Ganem and S. Rigo 493
Isotopic tracing of Si during thermal growth of Si_3N_4 ultrathin films
I.J.R. Baumvol, L. Borucki, J. Chaumont, J.-J. Ganem, O. Kaytasov, N. Piel, S. Rigo, W.H. Schulte, F.C. Stedile and I. Trimaille 499
Migration of organic residuals in interlayer oxide to SiO_2/Si interface
N. Kodama, H. Mori, S. Saito and K. Koyama 505
Computer studies of the surface mechanism of preferential sputtering of two-component solids. Ion beam analysis of surface composition in low dose regime
V.N. Samoilov, A.E. Tatur and V.I. Yastrzhembsky 509
Ion-beam characterization of alumina-supported silver catalysts used for ethylene epoxidation
G.B. Hoflund and D.M. Minahan 517
Method for determining the composition and orientation of III–V {001} semiconductor surfaces
M.M. Sung, C. Kim and J.W. Rabalais 522
The initial stage of Pb thin film growth on Si(111) surface studied by TOF-ICISS
Y. Tanaka, H. Morishita, J.-T. Ryu, I. Katayama and K. Oura 530
Depth profile analysis of strong metal–support interactions on Rh/TiO_2 model catalysts
Ch. Linsmeier, H. Knözinger and E. Taglauer 533
Stoichiometric changes of Si, $CoSi_2$ and $TiSi_2$ during low energy oxygen bombardment in combination with oxygen bleed-in
B. Brijs, J. Deleu, W. Storm, W. De Coster and W. Vandervorst 541
Characterization of the recovery and recrystallization of $SrTiO_3$ surface by ion channeling
F. Wang, M. Badaye, Y. Yoshida and T. Morishita 547
Surface structure of sulfur-terminated GaAs by medium energy ion scattering
M. Takai, M. Taketani and N. Yokoi 552

Section VIII. Time-of-Flight and High Energy Resolution

Analysis of a thin, silicon-oxide, silicon-nitride multilayer target by time-of-flight medium energy backscattering
R.A. Weller, K. McDonald, D. Pedersen and J.A. Keenan 556
ERD–TOF characterization of silicon-compound multilayer and graded-index optical coatings
S.C. Gujrathi, D. Poitras, J.E. Klemberg-Sapieha and L. Martinu 560
A high resolution magnetic spectrograph for ion beam analysis
W.M. Arnoldbik, W. Wolfswinkel, D.K. Inia, V.C.G. Verleun, S. Lobner, J.A. Reinders, F. Labohm and D.O. Boerma 566
Time-of-flight medium energy ion scattering study of epitaxial $Si/Si_{1-x}Ge_x$ superlattice structures
C.F. McConville, T.C.Q. Noakes, S. Sugden, P.K. Hucknell and C.J. Sofield. 573
High resolution RBS study of the growth and the crystalline quality of ultrathin YBaCuO films
D. Hüttner, O. Meyer, J. Reiner and G. Linker 578
Separation of scattered ions and neutrals in medium-energy ion scattering spectroscopy
T. Kobayashi, G. Dorenbos, S. Shimoda, M. Iwaki and M. Aono 584
Focusing in high-resolution time-of-flight elastic recoil detection analysis
A.J.H. Maas, S.S. Klein, F.P. Rademakers, A.W.E. Minnaert and M.J.A. de Voigt 588
Compensation for the energy spread of a Van de Graaff accelerator by using two time-of-flight systems
M. Bergsmann, F. Kastner, M. Geretschläger, P. Hörlsberger, W. Raab and P. Bauer 593

Section IX. Ion Beam Characterization of New Materials

Ion beam analysis of diamond-like carbon films
J.-P. Hirvonen, J. Koskinen, P. Torri, R. Lappalainen and A. Anttila 596
Analysis of stoichiometry of high-T_c superconducting films by RBS and PIXE methods
R. Šandrik, M. Jergel, V. Štrbik, K. Nakamura, A. Ishii, I. Orlic, S.M. Tang and F. Watt 602
Ion beam analysis of sialon ceramics
I.C. Vickridge, I.W.M. Brown, T.C. Ekström and W.J. Trompetter 608
Ion-beam analysis of silicon carbide
J.A. Leavitt, L.C. McIntyre, Jr., M.D. Ashbaugh, R.P. Cox, Z. Lin and R.B. Gregory 613
Channeling-like effects due to the macroscopic structure of porous silicon
Z. Hajnal, E. Szilágyi, F. Pászti and G. Battistig 617
Ion beam channeling and hyperfine interaction analysis for the characterization of stoichiometry and anti-site population in $LiNbO_3$
A. Kling, L. Rebouta, J.G. Marques, J.G. Correia, M.F. da Silva, E. Diéguez, F. Agulló-López, J.C. Soares and ISOLDE Collaboration. 622
Rutherford backscattering study of thin oxide layers prepared by reactive magnetron sputtering
N.P. Barradas, J.C. Soares, M.F. da Silva, T.S. Plaskett and P.P. Freitas 626
Heavy ion RBS characterization of multilayer coatings deposited through the sol–gel technique
X. Aslanoglou, P.A. Assimakopoulos, C. Trapalis, G. Kordas, M.A. Karakassides and M. Pilakouta. . 630
Microstructure and ion beam characterization of heteroepitaxial $Si_{1-x-y}Ge_xC_y$
H. Jacobsson, P. Ye, N. Herbots, S. Hearne and J. Xiang. 633
Analysis of strain in ultra-thin $GaAs/In_{0.2}Ga_{0.8}As/GaAs$ single quantum well structures by channeling technique
A. Kozanecki, J. Kaczanowski, B.J. Sealy and W.P. Gillin. 640
An attempt to make a buried layer of indium in aluminium by ion implantation
N. Kruse, G. Dybkjær, A. Johansen, K.K. Bourdelle and E. Johnson 645
Analysis of coated reflective glasses near the surface using IBA techniques
J.C. Pineda, E. Andrade, J. Rickards and E.P. Zavala 650
Channeling experiments on porous silicon before and after implantation
G. Battistig, V. Schiller, E. Szilágyi and É. Vázsonyi 654

Structural transformations in leached uranium dioxide
A. Turos, R. Falcone, A. Drigo, A. Sambo, L. Nowicki, N. Madi, J. Jagielski and Hj. Matzke 659
Application of ion-beam-analysis techniques to the study of irradiation damage in zirconium alloys
L.M. Howe, D. Phillips, H. Zou, J. Forster, R. Siegele, J.A. Davies, A.T. Motta, J.A. Faldowski and P.R. Okamoto 663
Evolution of the implanted ^{18}O concentration distribution in a $YBa_2Cu_3O_{7-\delta}$ film during rapid thermal annealing
Y. Li, J.A. Kilner, T.J. Tate and P.G. Quincey 670
On the complementary use of ion beam techniques in the near surface analysis of implanted alloys
U. Wätjen, H. Bax and J. Räisänen 676
Retention of nitrogen atoms implanted into carbon
J. Jagielski, G. Gawlik, A. Turos, L. Nowicki and N. Madi 681
Channeling analyses of epitaxially grown $YB_2C_3O_{7-x}$ thin film
J.Z. Qu, J.R. Liu, Q.Y. Chen, X.T. Cui and W.K. Chu 684
287 trapping of implanted hydrogen in type Ia diamond
C.G. Smallman, S.H. Connell, C.C.P. Madiba and J.P.F. Sellschop. 688

Section X. Synthesis and Processing

Enhanced surface hardness in nitrogen-implanted silicon carbide
C. Uslu, D.H. Lee, Y. Berta, B. Park, D.B. Poker and L. Riester 693
Composition analysis of ECR-grown SiO_2 and SiO_xF_y films
J.H. Burkhart, D. Denison, J.C. Barbour and C.A. Apblett 698
Ion beam mixing in ZnSe/CdZnSe strained layer structures
R. Morton, F. Deng, S.S. Lau, S. Xin, J.K. Furdyna, J.W. Hutchins, B.J. Skromme and J.W. Mayer . . 704
Lattice location of erbium atoms implanted into silicon
A. Kozanecki, J. Kaczanowski, R. Wilson and B.J. Sealy 709
Depth profiles in SiON and AlON thin films produced by ion implantation
M. Jacobs and F. Bodart 714
Channeled ion assisted epitaxial growth of Ge on thin Si substrates
K. Saitoh, H. Niwa, S. Nakao, Y. Miyagawa and S. Miyagawa 718
Molecular dynamics simulation of stable defect formation in Si via Coulomb explosion
S.A. Fedotov, M. Ishimaru, Y. Hiroyama, T. Motooka and A.M. Zaitsev 724
Surface disorder production during plasma immersion implantation and high energy ion implantation
M.A. El-Sherbiny, N.Q. Khánh, H. Wormeester, M. Fried, T. Lohner, I. Pintér and J. Gyulai 728
Scanning electron beam annealing of sputter-deposited titanium on silicon
M. Cervera, A. Climent-Font, J. Garrido, J. Martínez and J. Perrière 733
Phosphorus ion implantation in type IIA diamond
Z.H. Zhang, X.T. Cui and W.K. Chu. 739
High concentration nitrogen ion doping into GaAs for the fabrication of GaAsN
T. Shima, S. Kimura, T. Iida, A. Obara, Y. Makita, K. Kudo and K. Tanaka 743
Irradiation effects in α-SiC studied via RBS-C, Raman-scattering and surface profiling
J. Conrad, T. Rödle, T. Weber and W. Bolse 748
Damage and structural modification of CVD diamond films caused by α-particles
S.N. Mikhailov, J. Weber, Y. Baer, Y. von Kaenel, J. Stiegler, E. Blank and W. Hänni 753

Section XI. In Situ Process Monitoring

Fast position sensitive detection applied to time-of-flight ion scattering and recoil spectroscopy for realtime monitoring of surface composition and crystallography
J.A. Schultz, S. Ulrich, L. Woolverton, W. Burton, K. Waters, C. Klein and H. Wollnik 758

In situ MeV ion beam analysis of ceramic surfaces modified by 100–400 keV ion irradiation
N. Yu, T.E. Levine, K.E. Sickafus, M. Nastasi, J.N. Mitchell, C.J. Maggiore, C.R. Evans, M.G. Hollander, J.R. Tesmer, W.J. Weber and J.W. Mayer 766

In situ analysis of thin film deposition process using time of flight (TOF) ion beam analysis methods
J. Im, A.R. Krauss, Y. Lin, J.A. Schultz, O.H. Auciello, D.M. Gruen and R.P.H. Chang 772

In-situ Rutherford backscattering design for early SIMOX-SOI metallic screening
L.P. Allen, M. Farley, K.H. Purser, G. Ryding and T.H. Smick 782
